

JEL BasicLine

► JEL BasicLine

The filling station type JEL BasicLine is predestined for big bag filling with a focus on an economic use of machines. The robust construction, the attractive price and the low-maintenance operation are the benefits of the basic version.

► Operation

The empty big bag is suspended on one of the present hooks and fixed. After connecting the big bag inlet nozzle at the filling head, the connection is secured by means of a one-hand bag clamp and the filling process is started. Once the big bag has been filled, it is disconnected from the inlet nozzle, tied up and removed with a forklift truck.

► Machine equipment

The big bag filling station type JEL BasicLine consists of a frame with adjustable chains and a double-pipe filling head with aspiration connection.

► Areas of application

Chemicals	Plastics	Pharmaceuticals	Foodstuffs	Similar industries
