

Drum Hoop Mixer

JEL RRM

► JEL RRM

The JEL RRM drum hoop mixer is used for the mixing, homogenization and coloring of bulk solids and fluids. The mixer can also be used for small volumes of materials and, thanks to its compact design, even finds a place in cramped production halls. The JEL RRM is operated with no need for tools. A special hygiene variant is available for use in hygiene-sensitive areas of application.

► Operation

The drum filled with the mixing material serves as the mixing container and sits at an angle on the drum mounting on the drum hoop. When the mixing process is started, the drum hoop rotates onto the roller track and puts the drum into a tumbling motion. The angled drum position and the tumbling motion ensure intense blending of the components.

► Areas of application

Chemicals	Plastics	Pharmaceuticals	Foodstuffs	Similar industries
•	•	•	•	•

► Bulk solids

Grainy	Powdery	Finely powdered	Granular	Liquids
•	•	•	•	•

► Mixing applications

Mixing	Homogenizing	Dyeing

1 Can be operated with no tools

4 Intense mixing effect

2 Optional: Mixing add-on

5 Available in multiple sizes

3 Easy to use

6 Hygienic design variant

DRUM HOOP MIXER | JEL RRM

Mix with technology

Drum Hoop Mixer

JEL RRM

► Design

- Hygienic design variant available for high hygiene requirements
- 50 – 300 l mixing container
- Optional: three-paddle mixing add-on for optimizing the intensity of the mixing action
- ATEX design possible
- Option of variable RPM
- Various safety guards available
- Special designs upon request

Convincing facts

- ✓ Intense mixing effects even with only small amounts of additives or active ingredients, for example
- ✓ Adaptation for on-site drums possible
- ✓ Easy to change the mixing container
- ✓ Also suitable for small product volumes
- ✓ Tool-free operation
- ✓ Low maintenance design thanks to fewer and longer-lasting wear parts

SAFETY GUARDS

In order to ensure a high level of user protection, we recommend the use of safety guards. From the small protective hood through to aluminum grates which can be walked on or glass safety guards, we offer a variety of models.

Protective hood made from aluminum mesh and perspex

Glass safety guard which can be walked on

Safety guard which can be walked on made from an aluminum grate with control platform and access ramp

SPECIAL VERSIONS

The JEL RRM drum hoop mixer is available in various design variants. Special designs are also possible and are individually tailored to the respective customer's requirements.

Drum hoop mixer to accommodate two drums

Drum hoop mixer to accommodate two plastic bottles

Drum hoop mixer with glass container for the pharmaceutical industry

JEL RRM - Hygienic Design

Mixing in hygiene-sensitive production environments

The hygiene model of the JEL RRM is based on the FDA, EC 1935/2004 and GMP guidelines, as well as the principles of hygienic design. Thanks to the minimal dead space design and the quick and easy cleaning capability of all components, the hygienic design variant of the JEL RRM meets even the most stringent hygiene requirement.

► Hygienic design model

OVERALL AND SURFACE CONSTRUCTION

- Can be completely disassembled into individual components
- Stainless steel surfaces polished to different roughness depths or electropolished

Convincing facts

- ✓ Easy to clean thanks to smooth surfaces with no dead space
- ✓ Can be fully disassembled for thorough cleaning and disinfection of the individual parts
- ✓ Good accessibility to all parts thanks to an open design
- ✓ No surfaces for dirt to accumulate on
- ✓ Food-safe materials
- ✓ Documentation package for qualification (IQ, OQ, DQ, etc.)

MIXING ADD-ON

- Welded assembly with no parts which can be lost
- Pluggable spring terminal strips are easily removed for cleaning purposes and connected again

DRIVE

- Special cavity-free aseptic drive
- Smooth housing for easy cleaning
- Motor with no fan

ROLLER TRACK AND DRUM HOOP

- Open design with no dead space
- Drum mounting with food-safe plastic coating on the half shells
